PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building web services and APIs using Python, Django, and Django REST Framework. Hands-on experience in VoIP systems, large-scale products (VOD, SuperApp), and remote collaboration with small startups. Skilled in PostgreSQL, Redis, Docker, Git, Jira, and Agile workflows. Comfortable working across Backend, Frontend, DevOps, and QA teams. Currently expanding skills in FastAPI and AI prompting. Strong problem-solver, adaptable, and focused on continuous learning.

CORE SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), FastAPI, Flask
Databases: PostgreSQL, MongoDB, MySQL, Redis, SQL
DevOps & Tools: Docker, Linux, Git, GitLab, Nginx, Celery, Sentry, Postman
Collaboration: Jira, Agile, Scrum, Git Flow, ClickUp
Other: API Design, VoIP Systems, RabbitMQ, HTML, CSS, JavaScript (Intermediate)

PROFESSIONAL EXPERIENCE

Back-end Developer | DotOne — August 2025 – Present

- Contribute to large-scale products including VOD, AOD, and SuperApp in a structured, multi-team environment.
- Develop and maintain backend services with Python and FastAPI; integrate third-party providers and external services.
- Apply Redis, Celery, Sentry, and Docker for caching, background processing, monitoring, and containerization.
- Collaborate across teams using Git Flow and improve change management across multiple projects.

Freelance Back-end Developer (Remote) | Multiple Small Teams & Startups — May 2025 – August 2025

- Collaborated remotely with several small teams and early-stage startups on short-term backend projects.
- Solved real technical challenges for resource-constrained teams mainly using Python and Django.
- Delivered practical backend solutions while working independently and adapting to different requirements.

Back-end Developer | Guyan Afzar (GoyanAfzar) — November 2024 – May 2025

- Worked in a telecommunications and VoIP company on team and individual projects.
- Designed and implemented scalable APIs using Django and Django REST Framework.
- Strengthened skills in VoIP domain requirements, API design patterns, and software project management.

Back-end Developer (Remote) | DanoupGuys — October 2024 – Present

- Joined as backend intern via LinkedIn and transitioned to full developer role after successful internship.
- Build and maintain professional APIs with Django REST Framework.
- Work with Git Workflow, Jira, and Agile methodologies in a professional remote team.

EDUCATION

B.Sc. Computer Engineering — 2023 – Present
Islamic Azad University (Damavand Branch)
